Experience

February 2018 - Present

Parkridge Valley, Chattanooga – *Mental Health Technician II*

- Provides care to patients in a manner that promotes safety, comfort, and the therapeutic environment.
- Assists patients with activities of daily living; attends to patient behavioral problems and provides assistance in crisis intervention, as needed.
- Charts patient observations, following prescribed procedures and standards.
- Participates in the development and implementation of patient treatment programs.
- Maintains confidentiality of patient records.
- May perform initial patient evaluations to determine treatment priorities; may take vital signs, weights, and urine, stool, and sputum specimens.
- Performs group sessions, and in-service education

Projects

Refurn – [GitHub](#) – [Visit](#)

An imaginary business where a local user can upload furniture to sell, when they would normally throw it away. A CRUD app which authenticates users, and allows them to list their item for the owner to respond to. Currently in dev mode to showcase features. Can build in a production mode to secure routes and improve security.

Utilized - Node.js, Express, Axios, MongoDB, GoogleCloud Storage, React, React-Router, Passport, Bootstrap

IP Address Tracker – [GitHub](#) – [Visit](#)

An IP location finder tool that searches for the source location of the specified IP address. Displays the location source of the specified IP address. Option to generate random IP Address.

Utilized - React, TailwindCSS, Leaflet

Portfolio – [Github](#) – [Visit](#)

My Portfolio website made to show my working knowledge of HTML and CSS.

Utilized - HTML, CSS, TailwindCSS
